Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto et al.

See the Fig. 31 embodiment of Yamamoto et al. Note first wicks 201, which read on the claimed “partition wall mounted to said condenser plate to at least partially divide said sealed chamber . . . angling downwardly toward said base plate”. Note also that some of these elements are readable on the “reinforcing ribs” of claim 9.

Claims 14-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Mochizuki et al.

Note in particular the Figs. 12-13 embodiment. Regarding claim 18, note the Fig. 9 embodiment; the spacer wicks 36 read on the claimed reinforcement ribs.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 19 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mochizuki et al.

See the embodiments shown in Figs. 6 and 15; although these internal and external fins 23, 41a are not shown explicitly being used together in a single embodiment, it would have been obvious to one of ordinary skill in the art at the time the instant invention was made to combine these features in a heat pipe to achieve the benefits they provide in enhanced heat transfer efficiency, particularly since their aims (enhanced nucleate boiling of the heat pipe refrigerant, improved air side heat transfer by increasing surface area) are mutually exclusive.

Claims 2-8, 10-13, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The remaining references show various heat pipe type heat sink designs.
